

POOD BUREAU TO  
BOOK DR. YOUNGF. A. Shaw Commends the  
Doctor as a Lecturer and  
an Economist.

After visiting with Dr. C. C. Young at his Eden ranch, F. A. Shaw, who has been western manager of the Pood Bureau of New York for some time, has decided to prolong his stay in Texas and superintend the booking of Dr. Young on the Lyceum circuits throughout this country and Canada.

"Yes, I am to remain and arrange the booking tours for Dr. Young in the principal cities," said Mr. Shaw at the Sheldon this morning, "and the decision was reached after much correspondence and investigation of Dr. Young's previous experience on the lecture and Chautauque circuits of this country and Europe."

"It is a common remark nowadays that when a lecturer essays the platform he 'has a message,' and it is certain Dr. Young gives something worth while in his illustrated lectures on Russia, the views covering a wide range and many phases of the world power of his life in the forbidden sections of Asiatic Russia. Our Lyceum clientele is demanding pictures and at no time in the history of the platform has travelogue more popular with educational institutions and on the regular Lyceum course. Of the theme, Russia, its timelessness is apparent for that world power has been before us continually for years and particularly so since the great conflict as one of the principal allies participating; it is a land rich in historical interest and not so well understood."

"The Dr. Young platform has a man and a vital subject of great and present day interest. It has been my privilege and pleasure to meet the best of the stage, Lyceum and concert platform, but there is no more interesting person than Dr. Young, no better pictures a traveler and his collection of articles found in wide rambles and the wonderful rugs from Bokhara, a revelation to one in this country."

"And we must not fail to mention Dr. Young's efforts in establishing an industry of great value and interest to us, that of the importation and breeding of fur-bearing Karakul sheep from Bokhara, a part of Asiatic Russia. The sheep have been reared and crossed with our native Lincoln with great success in Texas and have found a ready market with furriers in New York and Europe."

"I wonder if we realize the importance of Dr. Young's efforts in building up this fine industry? If a man saves to this country \$11,000,000 for imports of fur, as it is shown by our own government's statistics that we import Karakul furs to that amount, then should he not be blessed as the man who makes two blades of grass grow where not one existed before the advent of water on your beautiful Valley of the Rio Grande?"

"The Lyceum 'season' begins in the fall and continues until early summer; we hope to book the doctor extensively during that time and if he only appears before churches of commerce and agricultural colleges and societies, we will be very busy individuals in office and on platform."

Mr. Shaw reports that Dr. Young is receiving many commendatory notices from foremost critics here and in Europe on the excellence of his book, "Asiatic Russia."

**MARTHA WASHINGTON'S WILL ORDERED RESTORED**  
Richmond, Va., Oct. 15.—Gov. Stuart has ordered that the will of Martha Washington, recently returned to the state by J. Pierpont Morgan, be given into the custody of Fairfax county from which it was stolen during the civil war. It will be formally delivered to the chairman of the Fairfax board of supervisors Monday and will take its former place in the court house.

MAKE NEW STRIKE PLANT FURNISHES  
IN MIDDLEMARCH FLOWERS FOR ILL.George Mitchell, Company  
Official, Asserts Mine is  
Showing Improvement.

Douglas, Ariz., Oct. 15.—George Mitchell, of the Middlemarch Metal company, who has arrived here after an automobile trip, asserted that the Middlemarch mine is showing improvement and that two excellent strikes in the property have been made in the past ten days.

Recently Mr. Mitchell installed a new process in the concentrating mill at the mine which is working out well in saving practically all the values. The mill has been closed for a week on account of work which is required on the boilers, but it will be in action from now on. The ore for the mill is coming from the sixth level of an incline shaft and runs as high grade. Altogether 17 cars of ore and concentrates have been shipped to the Copper Queen smelter here.

BUREAU OF MINES STARTS  
SYSTEM OF INVESTIGATIONS

Tucson, Ariz., Oct. 15.—Arizona state bureau of mines is considering plans for the utilization of minerals and nonmetals throughout the state. The bureau, metallurgist of the station is in charge of investigations which will be promoted by publications. This program will be of great assistance to those interested in the mining industry. During the year bulletins will be issued, each one dealing with a separate mineral which is to be found in commercial quantities in Arizona. Each bulletin will contain a brief description of the sources of the particular mineral described with an outline of the various field tests that are necessary for further discoveries. They will also contain information as to the use of these minerals with an outline of the various factors which govern the market, and how to ascertain whether or not the deposits are of commercial value. The character of the pamphlets will be local and applied to Arizona conditions.

EMBEZZLEMENT COMPLAINT  
AGAINST PRIMA DONNA'S SON

Patterson, N. J., Oct. 15.—At a meeting of the fire and police commission here last night chief of police Blinn was directed to make a complaint of embezzlement against Henry Schumann-Heink, the prima donna's son. Schumann-Heink, a clerk in the recorder's court, was suspended a month ago when discrepancies were found in his accounts. Experts claimed they found a shortage of about \$180.

The highest achievement in eyeglass construction is represented in our new model "eyeglasses. Comfort, quality, durability, appearance and reasonable price leave nothing to be desired. Geo. D. Kendall, 208 Mesa Ave., "Makes Glasses Right."—Advertisement.

The special process used in preparing Ayvalde Brand Oats is what makes them better. Ayvalde oats are put up in a paraffin-lined, moisture proof and airtight packages. Absolutely sanitary and free from bugs and weevil.—Advt.

Former El Pasoan Starts  
Cooperative Store, Milk  
Route and Pensions.

A cooperative company store which sells at cost tennis courts for the workmen, a milk route through the shops, old age pensions, workmen's compensations and flowers for the sick are some of the industrial innovations which a former El Pasoan has instituted in the great plant of the A. O. Smith company in Milwaukee.

He is B. Rosing, formerly superintendent of the Woman's Charity association in El Paso, and now superintendent of the safety and welfare department of the Milwaukee company which employs 1100 men and which makes automobile body axles, housings, drop forgings and other steel parts for automobiles. Mr. Rosing, who is visiting here, has been in charge of the safety and welfare department of the plant for two and one-half years and during that time has introduced many salutary changes in the methods of handling workmen in a great industrial plant.

**Plant Hospital.**  
In the safety division of his departmental work Mr. Rosing has installed a first aid hospital in the Smith company plant, where the injured are sent as soon as their injuries are received. There they are given emergency treatment and then sent to the hospital or to their homes, depending upon the cases. Through the foreman of each of the many departments, Mr. Rosing has introduced a system of safety first rules, which has resulted in the reduction of preventable accidents and this committee meets and considers suggestions from the foremen and, if worthy, these suggestions are embodied in the safety department rules.

## Finest Plant in State.

"The Smith company plant is the finest in the state of Wisconsin and is splendidly adapted to our work," said Mr. Rosing, who is here on his way to Milwaukee from the California fair. "The building measures 1050 by 257 feet, has no stairs or elevators other than those going down into the pits in the engine rooms and has a cement floor throughout. Half of the walls are of glass and 50 percent of this glass is on hinges so that it may be opened for ventilating the plant. In this plant we have a store at which working shoes, shirts and other wearing apparel, including a 'coverall,' which we consider more safe than the old style overalls, food and foodstuffs which the men may buy at cost for their lunches or when they are working overtime."

## Milk Route.

"We sell six checks for 25 cents and each of these checks may be exchanged for a sack of coffee or other five cent goods. The men mostly pay cash although we often carry the new men until they draw their first pay and then deduct it from their wages. In addition we have a milk route through the plant which gives the men fresh milk delivered at their homes at a cost of five cents a quart. In return for this service by which the men are supplied with one clean towel each week at a cost of five cents, they are given a laundry service for washing their overalls."

## Tennis and Baseball.

"Outside of the plant we have tennis courts, a baseball team which plays independent ball and other entertainment features for the men. In my office I adjust financial family troubles for the men, appear in court to represent them in garnishment cases, pay their insurance for them and deposit their savings. The workmen's compensation act, under the Wisconsin law, is paid to them weekly whenever they are injured and they do not have to wait for the companies to send the checks, thus avoiding delays at a time when the money is most needed. If the men are in the hospital from injuries or illness, we send them flowers and visit their families while they are away to see that nothing is needed. We also make charity donations of state funds each month to the worthy employees or former employees. I have started a plan of paid holidays for the men which I hope to extend to include all aged employees of the company. We also have an entertainment league and the benefits from the first entertainment will go to form an employees' mutual benefit association."

"The result of all this effort on the part of the company, working through the safety and welfare department, is to make the men happier, more contented and better citizens and the success of the plan has already been proved beyond question, I believe."

**Tuberculosis Exhibit.**  
While in Chicago in social service work, before going to Milwaukee, Mr. Rosing arranged one of the finest tuberculosis exhibits ever shown in this country. It consisted of 120 panels, upon which were mounted pictures and descriptive literature showing how to prevent tuberculosis. This portable exhibit was shown in all of the schools and playgrounds and centers of Chicago and was sent to the Illinois State Conference of Charities before being shown in Chicago. It was made two years ago and has been in constant use since that time and it is estimated that 500,000 persons have seen the exhibit, which is now being shown in the direction of the Chicago Tuberculosis Institute as a part of the anti-tuberculosis campaign.

Went To Sleep In Jitney;  
Has License Taken Away

Joe Ogile, driver of a jitney car on the Port Bliss line, owned by H. V. Craig, was arrested Thursday night for sleeping in the car while it was parked on the Texas & Pacific tracks. Judge Paul D. Thomas fined Ogile \$5 on a charge of being intoxicated and revoked his license to drive a public service car.

FIRE IN BAKESHOP AT FORT;  
MACHINE GUN AMMUNITION NEAR

Fire in the basement of the bakeshop at Fort Bliss, where much machine gun ammunition and stores were stored, caused a general alarm at the fort at 3 o'clock Friday morning, and the entire Eighth cavalry turned out to fight the fire.

The fire started near the bake ovens in the basement of the bakeshop and spread to stacks of supplies and other material which had been recently placed there by the Eighth cavalry. Although the ammunition was stored near the fire, none of it was damaged. The flames were put out before any serious damage had been done to the building. Some saddles and supplies were burned.

SENATOR UNDERWOOD VISITS  
PANAMA PACIFIC EXPOSITION

San Francisco, Cal., Oct. 15.—Senator Oscar W. Underwood, favorite son of Alabama, at the Panama-Pacific exposition, Alabama day, next Monday, arrives here yesterday and talked of necessary congressional legislation to meet the falling off in revenues as a result of the war. He said three courses were open to congress to meet a deficiency in revenues of \$100,000,000, retention of the duty on sugar, re-enactment of the emergency war tax, and increased federal income taxes. He predicted that the next house would adopt one or two or all these measures.
